EDUCATION

Pursuing BTech in CSE
(AI & ML), 2024-2028
KIET Group of Institution
12th, 2020-2022
Arya Kanya School and
Inter College

TECHNICAL SKILLS

C++/JS
NODE.js/Express.js/Rest APIs
MongoDB
AWS Cloud
IOT
Git/Github
Data Structure & Algorithm

WORKSHOPS/SEMI NARS

XR Creator Hackathon

CERTIFICATIONS

AWS Certified Cloud Practitioner
AWS ML Graduate
Google Hack2Skill
Kode Kombat 4.0
Mepro

PROFESSIONAL OVERVIEW

B.Tech CSE (AIML) student with hands-on experience in backend development, cloud platforms, and IoT-based systems. Proficient in building RESTful APIs, working with MongoDB databases, and deploying applications on AWS. AWS Certified Cloud Practitioner with a strong foundation in Data Structures and Algorithms.

PROJECTS

Food Ordering Website | 2025

Node.js, Express.js, MongoDB
Developed RESTful APIs for food ordering and user management
Designed MongoDB schemas for orders and customer data
Integrated frontend with backend using POST APIs
Tested and validated APIs using Postman

Portfolio Deployed on Cloud | 2025

Deployed applications on AWS EC2 (Ubuntu) using Linux and SSH.
Containerized a web app with Docker and managed it using Docker Compose.
Built CI/CD pipelines with GitHub Actions for automatic EC2 deployment on code push.
Configured Nginx, DuckDNS, and HTTPS (Let's Encrypt) for a live website.

Robo Dog – Innotech Hackathon | 2025

Designed and built a robotic dog prototype with basic movement
Implemented sensor-based obstacle detection

Smart Dustbin – Smart India Hackathon (Department Level) | 2025

Developed an automatic smart dustbin using sensors
Improved waste handling through automation

Travel Blogging Website | 2024

HTML, CSS, JavaScript, AWS S3
Built a responsive multi-page travel blogging website
Deployed the website on AWS S3 for public access

Smart Parking System | 2024

ESP32, IR Sensors
Designed an IoT-based parking slot monitoring system
